Employment

Postdoctoral Scholar, Department of Philosophy, University of South Florida. 2017–Present.

Education

Ph.D. in Philosophy, University of Tennessee, 2017.

Dissertation: *Population, Consumption, and Procreation: Ethical Implications for Humanity's Future*

Committee: John Nolt (Chair), David Reidy, Jon Garthoff, and Phil Cafaro

M.A. in Philosophy, University of Tennessee, 2013.

Thesis: *Wouldn't Future Generations Like to Know? A Compensation-Based Approach to Global Climate Change*

Committee: John Nolt (Chair), David Reidy, and E. J. Coffman

Technical Communication Program, University of Kansas, 2010.

B.A. in Philosophy and English, *Summa Cum Laude*, Baker University, KS, 2009.

Areas of Specialization: Applied Ethics (esp. Environmental Ethics), Epistemology

Areas of Competence: Ethics, Social & Political Philosophy, Philosophy of Religion

Works in Progress

1. “Intergenerational Equity and Population Growth” (under revision)
2. “Restoring Biodiversity as Compensation for Climate Change” (under revision)
3. “Understanding Biodiversity’s Value” (in preparation)
4. “Immigration, Population, and Moral Equality” (in preparation)

Conference Presentations

1. “Intergenerational Equity and Population Growth”
Association for Practical and Professional Ethics Meeting, February 2017.
2. “Unraveling the Asymmetry in Procreative Ethics”
Eastern Division Meeting of the American Philosophical Association, January 2016.
3. “Restoring Biodiversity as Compensation for Climate Change”
Association for Practical and Professional Ethics Meeting, February 2015.
4. “A Compensation-Based Argument for Geoengineering Research”
International Society for Environmental Ethics Meeting, June 2014.
5. “Integrity, Climate Change, and Individual Obligations to Reduce Emissions”
International Society for Environmental Ethics group session at the Eastern Division Meeting of the American Philosophical Association, December 2013.
6. “Abortion and Personhood: Can the Infanticide Objection be Eluded?”
Tennessee Philosophical Association Meeting, November 2012.
7. “The Asymmetry: No Solution Needed” (poster presentation)
Rocky Mountain Ethics Congress, August 2012.
8. “The Question We Should Be Asking about God’s Existence” (sole presenter; paper coauthored with Jordan Huzarevich)
Appalachian Regional Student Philosophy Colloquium, March 2012.
9. “Greater Knowledge in a Warmer World”
Association for Practical and Professional Ethics Meeting, March 2012.
10. “Moral Worth and Other-Regarding Inclinations”
Southeast Philosophy Congress, February 2012; published in the Proceedings of the Southeast Philosophy Congress, vol. 5 (2012): 85-98.
11. “Epistemic Supererogation and Its Implications”
Appalachian Regional Student Philosophy Colloquium, March 2011.
12. “Imperiled Newborn Cases and the Limits of Parental Responsibility”
Association for Practical and Professional Ethics Meeting, March 2011.
13. “The Circumstances of Justice and the Role of Justice as Fairness”
Tennessee Philosophical Association Meeting, November 2010.

Invited Presentations

1. Topic TBD
University of Tampa, October 2017.
2. “Apatheism: Uncharted Territory in Philosophy of Religion”
University of Tennessee Chattanooga, November 2013.

Conference Commentaries

1. Comments on Luke Semrau’s “Misplaced Paternalism and Other Mistakes in the Debate Over Kidney Sales”
Tennessee Philosophical Association Meeting, November 2016
2. Comments on Scott Aiken’s *Evidentialism and the Will to Believe*
Tennessee Philosophical Association Meeting, November 2014
3. Comments on Sergio Gallegos’ “Aesthetic Virtues in Environmental Virtue Ethics”
International Society for Environmental Ethics Meeting, June 2014
4. Comments on Martin Benjamin’s “Responding to Marx (Groucho, Not Karl) on Obligations to Posterity”
Pacific Division Meeting of the American Philosophical Association, March 2013.
5. Comments on Matthew Pianalto’s “Beyond Waiting”
Tennessee Philosophical Association Meeting, November 2012.
6. Comments on Karl Hammer’s “Kant’s vegetarian imperative”
Rocky Mountain Ethics Congress, August 2012.
7. Comments on Charles Cardwell’s “Justice versus fairness”
Tennessee Philosophical Association Meeting, November 2010.

Honors and Awards

1. Newcombe Dissertation Fellowship Finalist, Woodrow Wilson Foundation, 2016.
2. Graduate Travel Stipend for the Eastern Division Meeting of the American Philosophical Association, 2016.
3. Prados Summer Dissertation Fellowship, University of Tennessee, Summer 2015 and Summer 2016.
4. Graduate Student Senate Award for Outstanding Graduate Research, 2014–2015 and 2016–2017.
5. Chancellor’s Award for Extraordinary Professional Promise, University of Tennessee, 2014.
6. Richard Aquila Prize for Best Graduate Student Essay, University of Tennessee, Department of Philosophy, 2013–2014.
7. Karen M. T. Muskavitch Award for Graduate Work in Practical Ethics for “Greater Knowledge in a Warmer World,” awarded at the 2012 meeting of the Association for Practical and Professional Ethics.
8. Best Graduate Student Paper Award for “Epistemic Supererogation and Its Implications,” awarded at the 2011 Appalachian Regional Student Philosophy Colloquium.
9. University of Kansas Award for Outstanding Technical Writing, 2011.
10. J. Wallace and Katie Dean Graduate Fellowship, University of Tennessee, 2010–2011.

Dissertation Abstract

Human population growth is a contributing factor to a number of environmental crises, most notably climate change and biodiversity loss. My dissertation addresses both the negative environmental effects of human population growth and what ought to be done to curtail them. Specifically, I defend two main claims: (1) we have a duty to reduce human population, particularly those of us with large ecological footprints, and (2) morally permissible social policies can satisfy this duty.

I begin by addressing three well-known issues in population ethics that could serve as the basis for objections to reducing population: the Repugnant Conclusion, the Non-Identity Problem, and the Asymmetry. I then criticize several arguments supporting the claim that we ought not to reproduce *at all* and likewise dismiss the position that everyone has a right to reproduce as much as they please. This groundwork establishes that the correct view about the ethics of procreation must lie in the complicated middle ground between these positions – the middle ground that I explore in conjunction with the harmful effects of rising human population.

After surveying the environmental harms caused by rising human population (focusing in detail on effects caused by climate change and biodiversity loss), I argue that we have a collective duty to reduce human population in order to avoid causing catastrophic harm to future people. While we could attempt to reduce environmental degradation by reducing our rates of environmentally harmful consumption, it is not possible to do so rapidly enough to avoid environmental catastrophe: we must reduce human population as well.

Of course, before human population can be reduced, its growth must be halted. The remainder of the dissertation focuses on what policies might be implemented in the near term to slow population growth and whether these policies could be implemented in ways that are not profoundly unjust or otherwise unethical. Recent attempts to reduce population have frequently resulted in practices of forced sterilization, involuntary abortions, and sex selection. Moreover, since the areas of the world with the highest population growth are generally developing nations in Africa and Asia, there is also a deep worry that significant restrictions on procreative freedom would be deeply racist in application. I argue that some minimally coercive policies (e.g., tax breaks for smaller families) need not lead to such objectionable outcomes.

I close the dissertation by considering the ethics of individual procreative decision-making. On the basis of maintaining moral integrity and taking the harms of overpopulation seriously, I argue that couples generally ought to avoid having more than two children even in the absence of policies incentivizing this behavior and even when they live in parts of the world where their individual ecological footprints are relatively small.
